

Degree

I will need a Master's degree, PhD degree, or recognized equivalent in structural, marine, ocean engineering, civil engineering, or naval architecture for this job. Also a minimum of 5 years' experience; or an equivalent combination of advanced education and experience after graduation and knowledge of marine and offshore vessel structures required.

Skills I Need

They require you to have skills such as math, problem solving, and communication skills. You have to have a math level of 66 to be able to be one.(Which is a little higher than being able to calculate the square footage of a new under construction home)

What I Do

I will be designing and overseeing testing, installing, and repairing marine apparatus and equipment. I will typically work in offices, where we have access to computer software and other tools necessary for analyzing projects and designing solutions. We also design boats of all sorts from fishing boats to war boats.

Typical Day

Most jobs average a salary of about \$50k or \$60k - \$125k a year.

We prepare system layouts and detailed drawings and schematics. Inspect marine equipment and machinery, and draw up work requests and job specifications. Conduct environmental, operational, or performance tests on marine machinery and equipment. Sometimes, we must go to sea to test or maintain the ships that they have designed or built.

Salary

Most jobs average a salary of about \$50k or \$60k - \$125k a year. The usual pay for a Naval Architect who works in Houston is around \$77k a year. Which is approximately \$37.50 an hour and \$1,480 a year.

Companies

There are a bunch of other companies out there such as Metal Shark, Saab Inc., and many many others that create these types of boats.

S&B

S&B is a engineering and construction company located in Houston, Texas. S&B has spent decades building focused experience in key markets. Our technical experts and subject matter specialists understand the specific challenges you face in each of these segments and how to solve them. One of those segments being Marine Engineering.
